SUBJECT: IIM on Agricultural Reform

You are probably fully aware of all of this, but just in case wanted to pass on my perspectives. I think the referenced IIM is an excellent idea. In a meeting we had last week [redacted] said agricultural reform will be the US issue at the Venice Summit. Thus, this IIM is perfect. I am concerned, however, particularly given usual slippage, with the June 1987 targeted completion date. To be valuable to US participants at the June Venice Summit, it really needs to be disseminated in May. [redacted]
